

Joshua Karbowskiak

Product Designer

joshua.karbowskiak.au · linkedin.com/in/joshuakarbowskiak

Sydney, NSW · Australian Citizen

Profile

I build to understand. Most recently the sole designer at a 100-person data analytics company, where I audited their UI and ended up shipping their first design system and connecting that to AI for prototyping.

Projects

Designers Contribution Graph

A personal project used by 400+ people to visualise design activity across Figma files. Built using Claude Code and the Figma API.

Experience

Displayr · UX Design Intern

Jan 2026 – Apr 2026 · Sydney, NSW

- Reduced prototyping to under 10 minutes by building a new Claude Code workflow connected to the design system in Figma and Notion
- Built Displayr's first design system. It contained 27 components each with documentation and Figma assets. Design decisions were now backed by hard rules rather than assumed rules
- Audited their entire UI, cataloguing 87 design inconsistencies, and handing off solutions for engineers to build
- Redesigned the upload flow after conducting research into why 53% of trialists were dropping off. Worked with customer-facing teams to understand users and redesigned the user flow to address their needs. Picked up for the 2026 product roadmap

Australian Government · Creative Services Intern

Aug 2024 – Nov 2024 · Canberra, ACT

- Delivered 25+ thumbnails for department stories and events, meeting WCAG 2.1 AA and strict government brand guidelines

Sample Assist · Design & Marketing Intern

Mar 2024 – Nov 2024 · Wollongong, NSW

- Scaled 30+ screens from mobile to tablet while keeping UX and information architecture consistent
- Restructured prototyping screens so the team's move from Adobe XD to Figma maintained clean, semantic layering

Education

Bachelor of Design (Interaction Design)

Feb 2023 – Mar 2026 · Canberra, ACT

University of Canberra

University of Massachusetts Dartmouth (International Exchange)

Skills

Design

UX Research, Interaction Design, Design Systems, Accessibility (WCAG 2.1), Prototyping, Usability Testing, Information Architecture, Wireframing, Responsive Design

Tools

Figma, Jira, Miro, Adobe Creative Cloud (Photoshop, Illustrator, InDesign),

Development

HTML & CSS, JavaScript, React, Claude Code, Claude Skills
